

# WHAT DOES THE WORD LOVE MEAN TO ME?

By: Carlos Conde Muñoz, 1º Y

We have all ever felt love for someone, but what does this word mean to me? This is my opinion about love, a very beautiful feeling that involves respect, confidence and attraction.

We have been told love is a difficult and controversial way where we have to suffer, cry and fight; but, in my opinion, it is much easier and beautiful: love is a very nice feeling where two people feel good together, they have confidence, take care of each other and feel attraction.

But love is not only about kissing all day. There are different types of love: we feel love for our families, friends or pets, and all this kinds of love are pleasant and charming.

On the one hand, we don't have any doubts about the benefits and awesome moments love can give us.

On the other hand, it can be controversial and difficult: people stop feeling love, they don't feel attracted anymore and love stops. This is hard and painful but we have to accept it and be honest about it.

In conclusion I would say we should love and never lose faith, because we will find that special person to share the rest of our lives with.
